

**JIMMY CARTER**

May 26, 2011

I am delighted that you have built the new Mentor Walk program around the established core principles of the Campus Community Partnership Foundation. The foundation has a great track record of inspiring students with exemplary role models and of recognizing campus community partnerships and innovative student service learning projects that are linked to their academic disciplines.

The Mentor Walk addresses the importance of education and builds upon this by inspiring children to finish high school and attend university by using college students as their example. It highlights the importance of the role mentors and guardians play in the success of young people's education.

I encourage everyone to support and participate in this walk to promote education and mentorship to make a better world.

Sincerely,

A handwritten signature in cursive script that reads "Jimmy Carter".
